Schedule 02 - Computation of Retaliatory Taxes (Foreign Insurers Only)

South Carolina law requires that retaliatory taxes for foreign insurers be calculated by the use of an aggregate approach instead of an item-by-item approach. The aggregate requirements imposed by the foreign state for the privilege of doing business therein, including taxes levied under local ordinances, are compared with the aggregate requirements imposed in South Carolina for the privilege of doing business here, including taxes levied under local ordinances.

Complete Column A showing all taxes, fees, assessments and obligations due this state. Complete Column B showing all taxes, fees, assessments and obligations a South Carolina insurer would be required to pay your Domiciliary State under identical conditions. If the foreign state's aggregate total is greater than South Carolina's, the difference is collected from the foreign insurer as a retaliatory tax. If the remainder is negative, there is no retaliatory tax due.

A separate worksheet and/or home state tax return must be furnished showing rates, premium figures, and calculations. If this is not furnished, the Company may be subject to disciplinary action for failure to follow instructions.
